

HOST301 Hospitality and Tourism Marketing

Assessment Overview	
Assessment	ATI Written Report
Mark	Total 25
Due Date	11.55pm Sunday, Week 6
Word limit	1000 to 1500 words
Submission method	Written report on Turnitin in (.pdf) or Word (.doc)
Mandatory submission to enclose with assessments	• Cover sheet including name and CIM ID number • Acknowledging the use of GenAI form • “Show Your Work” document demonstrating how GenAI was used
Other requirements	Report: ○ Use 12 pt font ○ Double-space your document to allow room for feedback ○ State your name and student number in the document header ○ State the word count in the document header ○ Include a list of references (Max of 10 references) ○ Comply with the APA referencing style
Assessment Details	
This assessment requires students to compare and contrast traditional marketing principles with current hospitality and tourism marketing principles and practices. Students will choose a tourism/ hospitality organisation and analyse the marketing practices of their chosen organisation. In this 1000 – 1500-word report, the students are to use their theoretical knowledge of the course and apply it to the marketing practices of their chosen organisation.	
Important discussion points for consideration in your assessment	
This is an individual assessment.	

STAGE 1: Choose your organisation and conduct initial "fieldwork", visit their website, app, or physical location. Write a brief paragraph explaining your choice, focusing on its relevance and significance in the hospitality market.

The chosen organisation could be any 1 (one) or similar from the hospitality and tourism sector. You must choose an organisation you can **observe closely** (e.g. website, social media, customer experience, promotions). **Seek approval from your Lecturer before proceeding.**

A **hotel or hotel chain** such as *Marriott International* (brands like Ritz-Carlton, Sheraton, and Westin, *Hilton Worldwide* (Waldorf Astoria, Conrad, Hampton), *InterContinental Hotels Group* (IHG, Holiday Inn, Crowne Plaza, etc.), *Accor* (Sofitel, Novotel, ibis), and *Wyndham Hotels & Resorts*.

A restaurant or café brand

Cruise Lines: Royal Caribbean (e.g., Royal Caribbean International, Celebrity Cruises) Carnival Corporation (Costa Cruises, Princess cruises, P&O Cruises Australia etc) Norwegian cruise line holdings (e.g., Oceania Cruises, Norwegian cruise line etc)

Airlines: Major international airlines and national carriers

STAGE 2: Analyse at least 5 recent marketing campaigns (e.g., social media posts, ads, email newsletters) Create a "marketing diary" by screenshotting or recording 3-5 consumer interactions (e.g., user reviews on TripAdvisor or Instagram stories). Observe how value is created through experiences, like sustainable practices or personalised greetings.

STAGE 3: Examine the traditional marketing mix (Product, Price, Place, Promotion) as applied to your chosen organisation. Identify specific traditional marketing activities (e.g., print ads, direct mail) the organisation has utilised.

STAGE 4: Traditional vs Current Practices

Use the analysis table below to compare core principles like the marketing mix (4Ps) with modern evolutions (e.g., 7Ps including People, Process, Physical Evidence). For example, contrast Marriott's traditional TV ads <https://www.youtube.com/watch?v=JCtYA9bYuyQ> with their current TikTok influencer partnerships. <https://www.tiktok.com/discover/marriott-partnership-influencer>

Element	Traditional	Current	Key evolution
Product			
Price			
Place			
Promotion			
People			

Process			
Physical Evidence			

STAGE 5: Critical Evaluation of Contemporary Marketing Practices

Critically evaluate the **strengths** and **limitations** of **current marketing practices** used by your chosen organisation (e.g., influencer marketing, social media, personalisation, online reviews, or AI-driven marketing).

Discuss how these practices create value for customers and influence consumer behaviour. Consider whether contemporary marketing practices replace traditional approaches or work alongside them to achieve marketing objectives. Support your discussion with real examples.

STAGE 6: Integrate your findings in your reports, you may use tables and charts.

The Business Report structure should include:

- CIM (Canterbury Institute of Management) Assessment Task Cover Page
- Executive Summary
- Table of Contents
- Introduction
- Findings
- Recommendations
- References
- Appendices (if applicable)

Students must use APA 7th ed reference style. All sources must be acknowledged even when paraphrasing. Failure to provide adequate in-text references can be considered plagiarism under the CIM's Academic Integrity Policy.

Submission format:

- PDF file (.pdf) or Word (.doc)
- Use 12 pt font
- Include a bibliography

Comply with the APA referencing style

Marking criteria:

- Refer to marking rubric below
- Please ensure that you have covered all grading criteria before uploading your assessment to Canvas

What if I Miss the Assessment?

- You must complete the ATI on the due date and time.
- Late submissions: You may be penalised for failing to submit an assessment task on time. If you do not have authorisation, you may be penalised five (5) percent of awarded marks per day for up to five (5) days; thereafter your submission may not be accepted, and you may be awarded zero marks.
- If you miss the ATI ONLY for following reasons, you may apply for special consideration:
 - acute illness or
 - loss or bereavement or
 - hardship/trauma or
 - technological problems which could not be anticipated or avoided
- To apply for special consideration, fill the following form and attach evidence to support your reason for seeking special consideration (with 5 days of the due date).
 - [Special Consideration Application Form Link](#)
- If your reason is invalid, if you do not provide evidence, or your application is not made within 5 days of due date your application will be rejected.

Can I Use Generative Artificial Intelligence for this Assessment?

You may use generative AI tools such as ChatGPT or Microsoft Co Pilot ONLY to research and brainstorm ideas and approaches for completing your written report. Please make sure to properly acknowledge any use of generative AI using CIM APA Referencing Guide.

Purpose	Using GenAI to Support You	Example Prompt
1. Brainstorming and Summarising	➤ Use GenAI to understand key marketing principles and trends in hospitality/tourism, such as summarising traditional theories (4Ps) ➤ Brainstorm potential organisations from the list and initial ideas for comparative analysis	“Can you summarise the key traditional marketing principles (e.g., 4Ps) from hospitality textbooks and how they apply to tourism experiences? “Brainstorm 3–5 initial impressions for analysing (e.g., Ritz-Carlton Melbourne): How does it create value through modern digital channels vs. traditional brochures?”
2. Research Support (Not Factual Substitution)	➤ Ask GenAI to outline potential marketing practices for your chosen organisation, such as communication channels or consumer influences, drawing from general knowledge, then	“What are common marketing challenges in hospitality organizations like (Ritz Carlton), such as adapting traditional principles to contemporary consumer behaviours?”

	verify with your fieldwork or official sources. ➤ Use GenAI to suggest structures for your report sections, like comparing value creation strategies, but cross check with course theories and real evidence.	
2. Critical Thinking Prompts	➤ Use GenAI to explore alternative viewpoints on how traditional principles apply today, or challenge assumptions about value creation in your organisation's practices.	<i>“Why might traditional marketing principles like the 4Ps still outperform 2026 trends like AI personalisation in certain hospitality contexts?”</i>
3. Use GenAI to Visualise Ideas	➤ Tables and Graphs ➤ Images	<i>“Generate a flowchart showing how Ritz Carlton evolves from traditional 4Ps model to modern immersive storytelling, highlighting consumer behaviour impacts.”</i>

When NOT to use GenAI

2. ❌ Don't copy-paste entire sections (e.g. “summary of the journal article”) — these are generic and often lack depth or context.
3. ❌ Don't use AI to shortcut research — instead, let it guide your curiosity. Building on insights from GenAI-generated research resources, further explore and identify relevant academic and industry sources.
4. ❌ Don't hide your use of GenAI. Acknowledge it transparently if you used it at any stage of preparation.
5. ❌ AI should not decide what goes in a visual or table. Visuals should be based on your own research and analysis.

Critical Thinking Still Comes First

Generative AI is a useful tool to support your learning, but it **doesn't know your course, your assessment brief, or what your educator is looking for**. Only you can:

6. Prioritise which aspects are most relevant to your article analysis.
7. Evaluate and synthesise insights based on cross-checking the information from different sources.
8. Draw conclusions backed by data, evidence and references.

This assessment requires you to apply critical thinking skills, and they're not replaceable by GenAI technology.

Acknowledging Use of GenAI

If you choose to use GenAI in any of the ways mentioned above, you need to acknowledge its use by including the statement in the 'Acknowledgement Form.'

For example:

I acknowledge that I have used GenAI tools (specify the name of the tool) to help clarify the Business communication framework (Name) and to summarise the journal article's findings, aim and research methodology.

All analysis, synthesis, and conclusions reflect my own interpretation.

Any visual created using AI must be acknowledged in the reference list or appendix.

Example Acknowledgement Statement for AI-Generated Images

I acknowledge that the Presentation was generated using Gamma AI /Canva AI with text suggestions from my written report, which is based on my own work. All analyses and final content have been independently developed and written by me.

Important: How to avoid academic misconduct when using GenAI:

Follow Three Ticks approach

1. Use proper references to acknowledge the use of any GenAI tool following the CIM's APA Referencing Guide.
2. You must complete the **GenAI Acknowledgment Form** and submit it together with your assessment. The form is available on Canvas under Assessment as a Microsoft Word document titled **CIM Assessment Cover Sheet & GenAI Acknowledgment Form**. Please download the document, complete all required sections, and submit it together with your written report.

3. Maintain the proper record of how you have used GenAI for this assessment by following the “Show Your Work” guidelines, which are available on Canvas. You must enclose **“Show Your Work”** with your written assessment as an Appendix.

Rubric for ATI Written Report

	Fail (0 – 49)	Pass (50 – 64)	Credit (65 – 74)	Distinction (75 – 84)	High Distinction (85 – 100)
Depth and credibility of research	You have not demonstrated that you have conducted enough research (eg insufficient references to credible research or peer-reviewed academic literature), and/or you have relied on doubtful sources	You have demonstrated that you have conducted enough research (eg based on the number of references to credible research and/or peer-reviewed academic literature), and you have relied on credible sources	The depth and credibility of your research is above average (based on the number and quality of your sources)	The depth and credibility of your research is very good (based on the number and quality of your sources)	The depth and credibility of your research is exceptional (based on the number and quality of your sources)
Description of the issue/problem in terms of theories and concepts studied in this course	Your description of the issue/problem is inaccurate and/or demonstrates a lack of understanding of the theories and concepts studied (eg because of incorrect use of terminology)	Your description is accurate and demonstrates a satisfactory understanding of the theories and concepts studied	Your description is accurate and demonstrates an above average understanding of the theories and concepts studied	Your description is accurate and demonstrates a very good understanding of the theories and concepts studied	Your description is accurate and demonstrates an exceptional understanding of the theories and concepts studied
Coherence of analysis	Your analysis is unreasoned and/or poorly reasoned (eg because it relies on unsupported assumptions or misunderstands the theories and concepts applied)	Your analysis is mostly logical and well-reasoned	Your analysis is logical and well-reasoned to an above average standard	Your analysis is logical and well-reasoned to a very good standard	Your analysis is logical and well-reasoned to an exceptional standard
Support for analysis	Your analysis is insufficiently supported by theory and/or evidence	Your analysis is supported by theory and/or evidence	Your analysis is supported by theory and/or evidence to an above average standard	Your analysis is supported by theory and/or evidence to a very good standard	Your analysis is supported by theory and/or evidence to an exceptional standard
Creativity	Your paper lacks creativity	Your paper is appropriately creative, whether in substance or format	Your paper is appropriately creative to an above average standard	Your paper is appropriately creative to a very good standard	Your paper is appropriately creative to an exceptional standard

Use of a commercially appropriate document structure (eg 'executive summary,' 'circumstances,' 'issue,' 'analysis,' 'conclusion/recommendations')	Your document is not structured in a commercially appropriate manner (eg lacking relevant headings)	Your document is well structured a commercially appropriate manner (eg using relevant headings)	Your document is well structured a commercially appropriate manner to an above average standard	Your document is well structured a commercially appropriate manner to a very high standard	Your document is well structured a commercially appropriate manner to an exceptional standard
Use of academically appropriate document style, writing style and referencing system	You have not used an academically appropriate writing style and/or referencing system (eg you have used common terms or overly formal language or failed to use a recognised referencing system eg APA or Harvard)	You have used an academically appropriate writing style and referencing system	You have used an academically appropriate writing style and referencing system to an above average standard	You have used an academically appropriate writing style and referencing system to a very high standard	You have used an academically appropriate writing style and referencing system to an exceptionally high standard
